

# Working Safely at the Bench

## Recommended list of equipment for individual use

CORNING

Although the effects of the pandemic have lessened in many parts of the world, it's prudent to remain vigilant. Common-sense precautions, including individual benchtop equipment, can help you—and your labmates—work safely and productively. Here are some ideas that could help in protecting yourself, your colleagues, and your work.

### ▶ Stagger lab hours

Sign up for shifts to limit the number of people in the lab. Do laptop work (such as grant writing) from home.

### ▶ Prioritize hand hygiene

Wash hands with soap and water for at least 20 seconds before and after using gloves. Alternatively, utilize hand sanitizer stations and refill them often.

### ▶ Have situational awareness

Practice social distancing, and respect personal space. Keep at least 6 feet apart from colleagues.

### ▶ Wear PPE while cleaning

Use personal protective equipment (PPE) while cleaning. Wipe down reusable PPE (such as safety goggles) after cleaning.

### ▶ Use individual benchtop equipment

Consider buying additional equipment to limit using high touch items shared in your lab. Regularly clean and disinfect surfaces, equipment, refrigerator handles, and light switches with EPA-approved disinfectants.
