SERVICES

- National Projects Group (NPG) for bicoastal projects

You've Got to Have Faith

Faith Technologies, Inc., one of America's 20 largest electrical and technical service contractors, possesses a workforce of nearly 1,500 employees in 16 locations, working hard to instill unsurpassed levels of confidence in clients each and every day. With a uniquely comprehensive portfolio of design, installation, and maintenance services for high-speed IT, communications infrastructure, and other facility systems, Faith Technologies continues to exceed customer expectations and successfully address a wide variety of customer needs. Faith provides complete fiber optic cabling solutions from simple moves, additions and changes to complex multi-million dollar data center upgrades.

At Faith Technologies, it's about confidence – yours. The investment in their 200 full-time, certified installers and 7 Registered Communications Distribution Designers (RCDD) goes unparalleled. Marv Ebben of Faith Technologies states, "Because we fully understand that our success will continue to be our people, we have designed an elite program to support our employees as they serve our customers." The organization has developed a special group referred to as the National Projects Group (NPG) to specifically focus on the unique needs of bicoastal projects.

The strengths of Faith Technologies' culture serves as the

foundation for their long-term success. As they expand their nationwide presence with new offices, including Nebraska and Oklahoma, this Preferred Installer works diligently to ensure that its culture is consistently developed and maintained within new markets. Because of their relatively low turnover rate, Faith maintains a strong continuity of relationships with customers, thereby ensuring constant satisfaction.

Ebben goes on to say, "Being a member has helped Faith Technologies because the quality of Corning's products is second to none. It represents our business model very well." Corning Cable Systems is proud to have Faith Technologies as a Preferred Installer and looks forward to seeing what Faith accomplishes in 2009.
