## Precision Yields Results and Complete Customer Satisfaction

Precision Contracting Services (PCS) has 20 years of fiber optic network integration experience and a wealth of knowledge and experience that supports its clients' requirements for the most beneficial, best in class solutions. PCS has proved to be a provider with superior staff training and fiber optic knowledge.

PCS has the management expertise, technology, equipment and highly trained personnel to handle any communications construction project. With cable installation, splicing, testing and activation as well as complete network and infrastructure design utilizing their patented FiberTrak application, PCS offers clients a great spectrum of design and asset management tools for network administration.

Along with outstanding experience, PCS offers the following services:

- Intelligent Transportation Systems
- Federal Aviation & Homeland Security Networks
- Governmental Fiber Optic Infrastructure Networks
- Private MAN-WAN-LAN Fiber Optic & Wireless Networks
- Access Control Solutions
- Fiber Optic Security Fence systems

PCS recognizes the need for trained staff and commitment to excellence throughout the organization.

When asked about their NPI program status,

PCS states, “Our NPI membership allows PCS to promote recognition of these attributes by Corning, the leading manufacturer in the fiber optic industry. In addition, the ability to offer our clients an extended warranty for Corning solution projects gives these clients an added reassurance.”

Precision's dedication to performance is reflected in the daily application of commitment, quality, coordination and communication with clients. Their “future-proof” installations of Corning Cable System's LANscape Solutions allow network expansions and performance enhancements to achieve the greatest results.

PCS continues to be a valued installer of the Network of Preferred Installers with outstanding business ethics, teamwork, and customer-focused attitude.
