

# Corning® Filter System Upgrade Notice

Corning is upgrading our filter systems with new printing for quick and easy identification of filtration products. Along with new printing on the funnel, the color of our connectors will return to Corning orange for all membrane types. See photo (left).

The new printed filter identification is visible through our see-through “common” packaging. If you have any questions, please call our technical support team at 1.800.492.1110 or contact your local Corning sales representative.
