# FIBER TO THE HOME

CHANGING THE WAY YOU **LIVE, WORK & PLAY**

Corning, the leader in fiber optic technologies, is bringing you the life-enhancing benefits of fiber to the home. Distance learning, telecommuting, video on demand and online gaming are just a few of the existing applications that fiber to the home makes possible.

Contact your local provider to find out more about the specific service offerings in your area.

## **Why Corning?**

Corning is a diversified technology company with a proud history for developing breakthrough technologies that significantly improve people's lives. We have been changing the world through innovation for more than 150 years. Our fiber optic products have been used in the communications networks of the biggest and most profitable companies in the world.

Who better to bring fiber to your home?

## LIVE

**Buying a home in a fiber-connected community will change the way you live.**

Taking courses from a university three states away, sharing a video of your child's first steps with family across the country, doing your shopping and banking online – it's your life... only better.

## WORK

**Living in a fiber-connected community will change the way you work.**

Do you have better things to do with your time than sitting in traffic or waiting an hour for a presentation to be downloaded? The bandwidth that the fiber provides can make you as efficient at home as you are in the office.

## & PLAY

**Relaxing in a fiber-connected community will change the way you play.**

Imagine watching the latest movie – in high definition, no less – whenever you want to, without leaving your home. Or playing football with your best friend from high school, who lives on the other side of the world, via your online gaming console. With the boundless bandwidth of fiber, the only limit to your entertainment is your imagination.
