Integrated Single-Panel Housing

CORNING

Features and Benefits

Factory terminated
Eliminates need for field termination, improving reliability and speed of deployment; faster, easier installation and moves, adds and changes
Configurable in 12 and 24 fibers, single-mode and multimode, supporting SC, LC and ST® compatible connectors
Network flexibility

Corning Integrated single-panel housing utilizes the OptiTip® adapter with the small-profile single-panel housing for quick and easy deployment eliminating the need for field-terminated and strain-relieved fiber optic cables. The housing is ideal for star, ring, point-to-point, or zone architectures. Factory-terminated panels provide industry-leading quality and reliability while eliminating the time required for field-termination methods and the need for specialized field-termination tools, training, and specially prepared locations. The compact unit is ideal for use inside NEMA- and IP rated enclosures and other environments where space is a premium.
