

Features and Benefits

Industry-leading cabinet size

Significant freight, storage and installation efficiencies

Full factory-stubbed cabinets

Enables quicker installation and rapid emergency restoration

Splitter modules are interchangeable within the Gen III and Eclipse Hardware family

Streamlines logistical needs and reduces part numbers and inventory

32 connector parking clips that snaps easily into the parking door

Fast field parking of unused splitter module connectors

The OptiTect® Indoor Local Convergence Cabinet, Gen III Series provides everything necessary to distribute up to 432 distribution fibers for indoor Multidwelling Unit (MDU) FTTx applications. All Gen III Indoor cabinets feature intuitive fiber management and internal layout to minimize training and optimize installer productivity.

Feeder fibers, distribution fibers, splitter modules, splicing and unused splitter output storage are all contained within a single, rugged, wall- or rack-mountable enclosure. Factory preconnectorization and installation of feeder and riser cable(s), or splice capability, ensure quick, easy and reliable installation in the field.

The Gen III Indoor cabinet also features an innovative swing-out panel for rear connector access and an integrated storage door for parking unused splitter module output connectors.

Cabinet Configurations

The OptiTect® Indoor Gen III Local Convergence Cabinet is available in multiple configurations. It can be purchased pigtailed, fully stubbed or partially stubbed.

Pigtailed Cabinet

A pigtailed cabinet is ordered without the feeder and distribution cables. All feeder and distribution fields are preconnectorized and pigtails are routed to the splice chamber. The installer will strain-relieve and route both the feeder and distribution cables down to the splice chamber to splice to the pigtails of preconnectorized inputs and outputs. Use the part number matrix titled, "Pigtailed: Field splice Feeder and Distribution"

Fully Stubbed Cabinet

A fully stubbed cabinet is supplied with factory-installed feeder and distribution cables. As no splicing is necessary inside the cabinet, the splice chamber is not included on this model. Use the part number matrix titled, "Fully or Partially Stubbed Feeder and/or Distribution"

Partially Stubbed Cabinet

A partially stubbed cabinet can be ordered with either a feeder or a distribution cable. All feeder and distribution fields are preconnectorized and the appropriate pigtails are routed to the splice chamber. The installer will strain-relieve and route the cable down to the splice chamber to splice to the pigtails of preconnectorized inputs or outputs. Use the part number matrix on titled, "Fully or Partially Stubbed Feeder and/or Distribution"

Specifications

Design						
	Configuration	Color	Connector Type	Maximum Number of Splitter Modules 1x32 or dual 1x16	Maximum Number of Splitter Modules, Slim	Splitter Output Parking Capacity

Note 1. Feeder fiber count should match or exceed maximum splitter capacity of 1x32 or 1x16. See Splitter Module Specifications.

Gen III Indoor - T2 Splitter Modules

All Gen III splitter modules are compatible and interchangeable across indoor OptiTect® Gen III Cabinets and cLCP (Compact Local Convergence Point) Cabinents, as well as the Corning Eclipse® Hardware family. These splitter modules meet applicable sections of Telcordia GR-1209-CORE and GR-1221-CORE. Each module features connectorized inputs and outputs.

Features

- Indoor use rated splitter
- Robust housing protects module during installation and throughout product life
- Integrated parking clips installed on connectors
- Interchangeable across indoor OptiTect® Gen III Cabinets and Eclipse® Hardware family
- Slim module is half the thickness of full-size module to maximize cabinet density; module is shipped with cabinet mounting bracket

Standard-Performance Devices							
	Dimensions (HxWxD)	Insertion Loss, Typical	Insertion Loss, Maximum	Uniformity	Return Loss	Directivity	PDL
1x32 Splitter Module	63 mm x 23 mm x 125 mm	15.7 dB	17.1 dB	1.5	> 55 dB	> 55 dB	0.3
