

Building Access Terminal (BAT) Classic

BAT Box, Size S | Photo CRR1234

BAT Box, Size XL | Photo CRR1220

A Building Access Terminal (BAT) is a wall-mountable combination of a fibre termination point for outside plant access cable and a building distribution point in one unit. It ensures a clear separation between outside plant cable, optical devices, and building distribution cables. A BAT provides a great level of flexibility for splitting, splicing, as well as patching applications, and is available in various sizes to address different capacity requirements.

Its slim, shallow design and rounded housing edges give the BAT an unobtrusive appearance.

The housing accepts cables and microducts up to 12 mm outer diameter and up to 18 mm for size L and XL when using PG glands, entering from bottom or top. Foam sealings provide IP55 rating for various cable types and quick add-ons.

The design of the BAT enables easy access during installation. Multiple units can be placed side-by-side to increase capacity without the need for an additional duct. This also allows separating access for different operators.

The internal components of a BAT can be pulled out or rotated for safe and easy access, also splice trays of BAT Classic are specifically optimised for storage and handling of 900 µm fibre.

The BAT is made of flame-retardant material, making it ideal for MDU applications.

Features

Available in four sizes (S, M, L, and XL)

UL94, V01, and UV stable material

Trays optimised for 900 µm fibre

Splice, patch, and splitter option

Bottom- or top-entry for microducts or cable, up to 12 mm

EMKA lock, Philips screw, Torx screw or no locking system

Standards

RoHS

Free of hazardous substances according to RoHS 2011/65/EU

Ordering Information (continued)

Total number of installed pigtails (to be spliced to feeder) Outside Plant Access Network
00 = No Pigtails
02 = 2 Pigtails
04 = 4 Pigtails
...
64 = 64 Pigtails

10

Total number of installed pigtails (to be spliced to drops) Inhouse Network
00 = No Pigtails
02 = 2 Pigtails
04 = 4 Pigtails
...
64 = 64 Pigtails

11

Select color-coding of pigtails
X = No Pigtails
N = No color coding (yellow)
T = Telcordia
V = DIN VDE

12

Splitter input connectorization
O = No Splitter
C = Connector - connected to panel
S = Not Connectorised - routed in the tray

13

Splitter output connectorization
O = No Splitter
C = Connector - connected to panel
S = Not Connectorised - routed in the tray

14

Splicing type
H = For Heat-shrink splice protectors
C = For Crimp splice protectors

Note: You can also select the BAT components and parts separately for customised configurations and bulk orders. These are stated in the next section of the data sheet.

BAT-Box Size XL, Grey with EMKA Lock | Photo CRR1219

BAT Housing

The Building Access Terminal (BAT) housing is available in sizes XS (Small Floor Terminal), S, M, L, XL to address different capacity requirements. It is lockable with a screw- or EMKA-Lock.
Options to choose: E = EMKA, S = Philips screw, T= Torx screw and N = No Lock included

Features and Benefits
Grey colour
Side walls shaped to ensure maximum freedom of accessibility
Strain-relief for cables up to 12 mm diameter
Modular configurable and extendable

Cable entry components

Cable entry components for the Building Access Terminal (BAT) include strain-relief cables and tubes of different diameters, that seal the BAT against dust and fluids. Cables can be added or removed at any time.

Features and Benefits
Modular and interchangeable cables that seal and provide strain-relief

Patch Module Equipped with Four LC APC Duplex Adapters
Photo CRR1837

Patch Module

Patch Modules for the Building Access Terminal (BAT) hold SC, LC, and MPO adapters. They provide a lift-up mechanism for better finger access, locks in both positions and can be removed completely.

Features and Benefits
SC, LC, E2000, or MPO Adapters
Module lifts and locks for safe and secure access, detachable

Module Equipped with 1x32 Splitter | Photo CRR1232

Splitter Module

Splitter modules or the Building Access Terminal (BAT) host up to four 1x4 or 1x8 splitters or one 1x16 or 1x32 splitter mini-module. The modules flip and rotate for easy access to splitter legs while protecting fibres and bend radius.

Features and Benefits	
Houses one 1x16, 1x32, or up to four 1x4, 1x8 splitters	
Flip and rotate for easy access
