

CORNING

Fiber to the Home

Changing the Way You **Live, Work and Play**

Why Corning?

Corning Optical Communications is a pioneering leader in revolutionizing internet connectivity through advanced fiber-optic technology. With an unwavering commitment to enhancing communication, we empower communities by seamlessly bringing fiber-optic networks directly to homes.

Corning transforms the way we connect, work, live, interact and play with reliable and future-ready solutions to bring broadband home.

LIVE

Buying a home in a fiber-connected community will change the way you **live**.

Taking courses from a university three states away, sharing a video of your child's first steps with family across the country, doing your shopping and banking online – it's your life...only better.

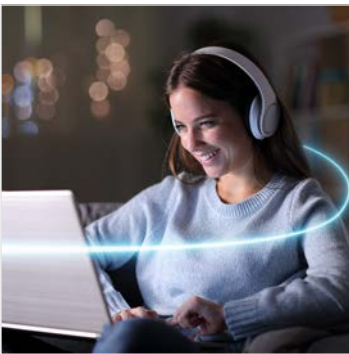

WORK

Living in a fiber-connected community will change the way you **work**.

Do you have better things to do with your time than sitting in traffic or waiting an hour for a presentation to download? The bandwidth that the fiber provides can make you as efficient at home as you are in the office.

& PLAY

Relaxing in a fiber-connected community will change the way you **play**.

Imagine watching the latest movie – in high definition, no less – whenever you want, without leaving your home. Or playing football with your best friend from high school, who lives on the other side of the world, via your online gaming console. With the boundless bandwidth of fiber, the only limit to your entertainment is your imagination.
