Biographical Information

Josh Jacobs

Technology Manager, Product Performance & Reliability,
Corning® Gorilla® Glass, Corning Specialty Materials

Josh Jacobs is currently the technology manager of product performance and reliability within the Specialty Materials development organization. In this role, he and his team focus on product reliability and qualification testing, as well as value proposition development and the deployment of measurements and methods for testing the performance of Gorilla Glass.

Jacobs joined Corning in 1998 as a process reliability engineer in the Photonic Technologies organization. Before joining Specialty Materials Development, he supported Corning's Optical Fiber organization, most recently as the supervisor of product engineering.

Jacobs possesses both Bachelor and Master of Science degrees in Ceramic Engineering and Glass Science, respectively, from the New York State College of Ceramics at Alfred University.
