CORNING

CORNING'S FAMILY OF BRANDS IS GROWING!

We are pleased to present the Corning Ordering Guide which includes product ordering details for our new family of brands.

Through acquisition and ongoing R&D investment, Corning now offers a more comprehensive range of premium, innovative laboratory products and solutions for a wide spectrum of life science applications. Our trusted, quality brands, backed by technical expertise, provide researchers with better ways to advance their research from the beginning of their process to the end.

In this part of guide, you will be able to find our complete range of Laboratory glassware and plasticware under Corning premium brands such as Corning®, Costar®, Gosselin™ and PYREX®.

To provide complete workflow solutions to researchers in Life Sciences, we are increasing our portfolio of solutions and including high quality Pyrex Laboratory Glasswares, reusable plastics and Gosselin range of Microbiology range of products in this guide

Through these brands, we are committed to meeting customers' unique and changing needs with original solutions for today's emerging life sciences technologies. Our dedication to quality, technology and innovation continues to enable us to produce the world's most comprehensive line of life science tools.

4 Beginning-to-end Solutions Genomics

From sample collection to storage, extraction and purification, Corning offers high-quality, innovative consumables and kits to support genomics workflows. Our range includes reagent kits, Axygen® brand magnetic bead-based kits, and our unique IMAG™ separation devices, all of which are optimized to make Next-Gen Sequencing library preparation processes more efficient.

5 Beginning-to-end Solutions Microbiology

From sampling and preparation to bacteria growth and analysis, Corning has a range of products and brands to provide a complete solution for microbiology and quality testing. In addition, our Gosselin™ brand products are optimized for both Food and Beverage and Environmental testing laboratories, complying with international safety standards and includes features to ensure traceability.

6 Glassware Solutions for Laboratory

In Science, research can take many forms, from synthesizing compounds to building computational models or gathering and analyzing data using a wide variety of instruments and techniques. Corning has been a valued supplier to chemists for nearly a century since the introduction of PYREX® low expansion borosilicate glass that is now the quality standard for labware worldwide. Recently Corning also introduced reusable plasticware range for Laboratory use.

Corning® Fetal Bovine Serum

Supply Chain, Capabilities, and Product Offerings

Are you looking for a steady source of serum to help accelerate your journey from the bench to the production line and bring life-changing pharmaceuticals to market?

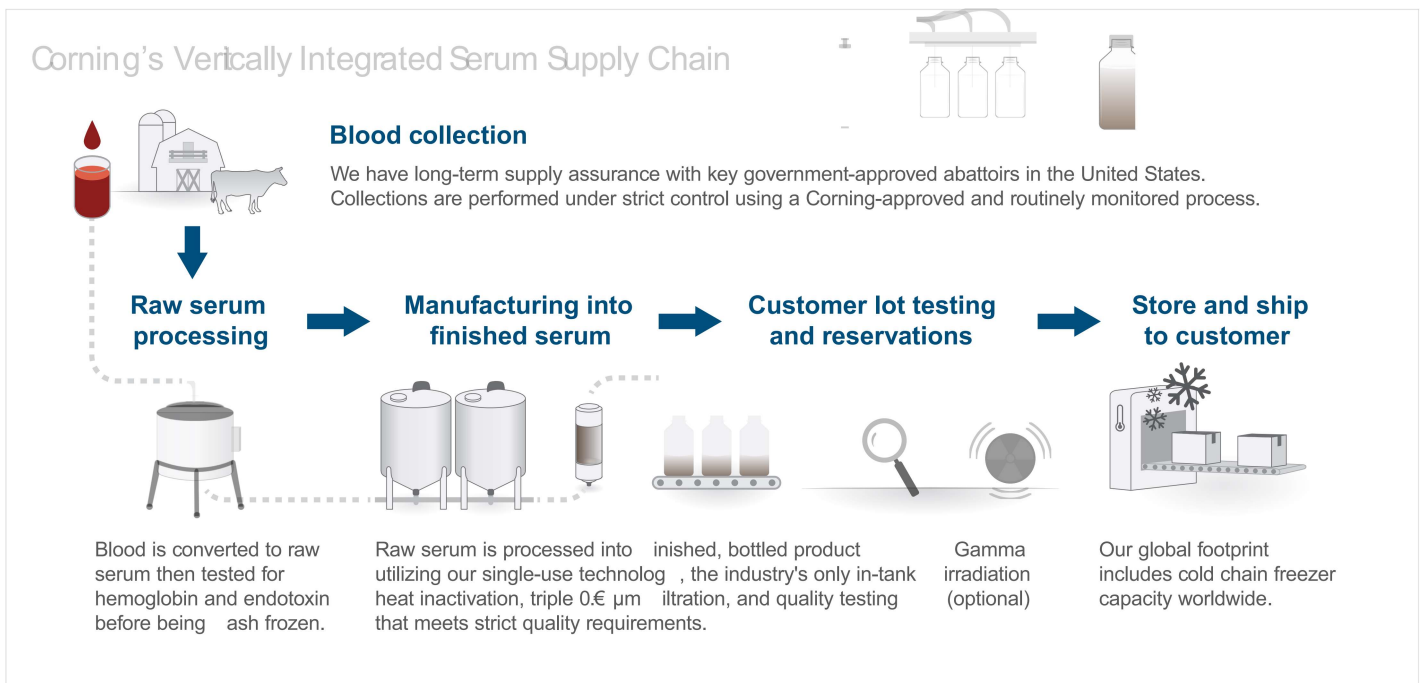

Corning is ready, willing, and able to provide you with a stable supply of quality serum – available when and where you need it. As a leader in cell culture products we are committed to providing you with the knowledge, expertise, and hands-on support to deliver what's next. We're ready when you are.

Why Choose Corning Fetal Bovine Serum?

Corning offers a wide variety of fetal bovine serum (FBS) options to satisfy multiple applications from cell culture research to complete bioprocess production. Our FBS is a perfect complement to our classical and custom cell culture media products. We draw on our fully integrated supply chain, comprehensive product offering, and manufacturing capabilities to help you produce consistent, reliable, and reproducible results.

Supply Chain

Our vertically integrated serum supply chain, from collection to scientist, allows us to provide a consistent supply of FBS, even during times of regional supply constraints – assuring you can continue your critical manufacturing work for the long-term. Corning's direct relationship with abattoirs ensures that collectors use our tools and training and adhere to strict aseptic techniques for blood collection at government approved facilities. Corning Life Sciences is certified for traceability by the International Serum Industry Association (ISIA) and every lot is tested to confirm origin. You can be confident in the source of material from Corning.

Comprehensive Product Offering

We offer FBS from various countries of origin for both Regular and Premium grade to meet your product demands.

Regular FBS is derived from government inspected facilities from countries that are approved by the USDA for import into the United States. Most countries are recognized by the World Organization for Animal Health (OIE) as having a negligible risk of Bovine Spongiform Encephalopathy (BSE) and being free from foot and mouth disease (FMD).

Premium FBS is only collected from government inspected abattoirs in the United States, Australia, and New Zealand and derived from healthy bovine cows and heifers that have passed ante- and post-mortem inspection. These countries are recognized by the World Organization for Animal Health (OIE) as having a negligible risk of Bovine Spongiform Encephalopathy (BSE) and being free from foot and mouth disease (FMD).
