

Dear Trusted Suppliers,

In 2023, Corning's [science-based GHG emissions reduction targets were approved by the Science Based Target initiative](#). Our suppliers will be critical in helping us achieve these targets.

Therefore, we will be including new GHG emissions requirements in our Supplier Code of Conduct and future supplier contracts. In 2024 we are requiring our suppliers to disclose scope 1, 2 and 3 greenhouse gas (GHG) emissions data through the upcoming CDP Supply Chain disclosure cycle. More details about the requirements will be provided in a secondary email.

Suppliers are also required to complete additional decarbonization actions to reduce their carbon footprint. These actions support the reduction of Corning publicly stated goals of a scope 3 reduction by 2028. Please review the supporting documents attached to this email for more information.

Important Call to Action

Please prepare to complete the CDP Climate Change and Water Questionnaire and submit this information to Corning by **Sept 18th, 2024**, through CDP's Online Response System (ORS). The most appropriate person to complete this task is typically someone responsible for environmental management and disclosure (e.g., someone in ESG, environmental sustainability, facilities management, or community affairs). If you are not the appropriate person, please reply to gsmsustainability@corning.com with the appropriate contact.

The CDP Questionnaires ask you to report information such as: your risks and opportunities associated with climate change and water, your emissions, your water withdrawals, details on your emissions and water management strategy including targets and actions you've taken to reduce your emissions and water impact. We will use the information suppliers report through CDP to calculate our scope 3 emissions, track progress against our science-based targets, and identify areas for collaboration and improvement.

We recognize that there are many stages of sustainability maturity, and we are here to support you in this journey. In the coming months, more information about supplier specific requirements beyond reporting to CDP will be communicated. Additionally, we will be offering several training webinars on the key sustainability topics outlined below. More information about the webinars will be shared in a secondary email.

Key Dates for 2024:

- **May-June** Corning has carefully selected training topics most relevant to our supply chain partners, which will be hosted in the next few months. Trainings will be available for all suppliers, but please be aware that specific trainings are mandatory based on your maturity level as outlined below.

Training Topic	Mandatory If	Format
Megaton Program Overview and supplier expectations	For all suppliers	Webinar plus training materials
CDP program overview and supplier expectations	For all suppliers	

- All webinars will be recorded, and capacity building information will be available shortly.
- June 4: Launch of the CDP platform
- Sept 18: Deadline to submit questionnaires to CDP and be eligible for scoring
- Oct 2: CDP Online Response System closes

Next Steps

If you had access to the CDP Questionnaire last year, you don't need to register again. Your CDP contact is also included in this email. Please connect with your internal contact to ensure all required data is submitted per the CDP deadline.

If your organization did not submit a CDP questionnaire in 2023, you will need to register to submit data through the portal. More details about the requirements will be provided in a secondary email.

Once registered, CDP will send an email to the registered user instructing them to log in to CDP's Online Response System (ORS) and begin the survey. Recipients of this email will be included in future reminders and communications from Corning but may or may not receive communications from CDP. If there is someone else in your organization that should be included in our communications or anyone who should be removed, please let us know by contacting gsmsustainability@corning.com

Corning will be providing support for you along the way, especially if you are just starting in your sustainability journey. The Corning-led supplier support webinars will also be recorded and made available to you if you were not able to attend or would like to rewatch the training.

Please feel free to reach out to us at gsmsustainability@corning.com with any questions or concerns.

We look forward to working with you on this program.
