Component Related Regulatory Information

This product may be regulated and have exposure limits as identified in Section 8.

**Component Information/Information on Non-Hazardous Components**

Optical Fiber consists of a thin glass filament in a polymer coating. The polymer coating has a thin outer coating of various colored inks. Glass is a solid material produced by combining various raw materials (e.g. oxides, carbonates, etc.), melting these components together, and cooling to a non-crystalline solid having its own unique properties.

Processing of this article may produce dusts or fumes which are considered hazardous under 29 CFR 1910.1200 (HazardCommunication).

### Section 4 - First Aid Measures

**First Aid: Eyes**

Eye injuries from glass fibers should be treated by a physician immediately.

**First Aid: Skin**

Abrasions from any cut or ground fibers should be treated promptly with thorough cleansing of the affected area. Seek medical attention for prompt removal of any particles that may be embedded under the skin.

**First Aid: Ingestion**

Seek medical attention if material is ingested.

**First Aid: Inhalation**

If inhaled, remove person to fresh air. If symptoms develop or persist, get medical attention.

**First Aid: Notes to Physician**

Sharp edges of glass may cause mechanical injury.

### Section 5 - Fire Fighting Measures

**General Fire Hazards**

See Section 9 for Flammability Properties.

Coating portion of this material may burn at elevated temperatures.

**Hazardous Combustion Products**

Carbon dioxide, carbon monoxide, various hydrocarbon fragments, phosphorus oxide, and possibly some carbon-containing fragments of the polymer coating.

**Extinguishing Media**

Use methods for the surrounding fire.

**Fire Fighting Equipment/Instructions**

Wear full protective clothing, including helmet, self-contained positive pressure or pressure demand breathing apparatus, protective clothing and face mask.
