TRANSMISSION PROPERTIES

As delivered, this glass is not photochromic. Photochromic properties are developed during the heat cycle used for fusing or forming.

Corning S.A.S. Optical customer engineering will provide full assistance to achieve consistent transmission properties, equivalent to those of 8111 glass code.

Order acceptance is submitted to technical agreement with Corning S.A.S. Optical customer engineering representative.

For more information on transmission or other material properties, refer to code 8111 product data sheet.
